

Technology Staffing Solutions

Skilled Talent. Delivered Fast.

Onshore. Offshore. Hybrid.

Who We Are

Technology staffing built for enterprise scale

Vertis Global is a technology staffing firm with 200+ consultants and two decades of delivery experience across Fortune 500 programs.

We operate onshore (US) and offshore (India), giving clients the flexibility to scale teams based on project needs, budget constraints, and compliance requirements.

Our consultants are pre-vetted, domain-experienced professionals who integrate into client teams and start delivering from week one.

Profile Turnaround

Our Staffing Model

Three flexible engagement modes designed to match your project scope and timeline.

MOST COMMON

Staff Augmentation

Individual contributors embedded directly into your project teams. They report to your leads, follow your processes, and ramp within days.

LARGE PROGRAMS

Team Deployment

Full squads with a technical lead. We assemble the team, manage coordination, and deliver against your milestones. You retain full visibility.

FIXED SCOPE

Project Based Staffing

Outcome-scoped engagements with Vertis-managed resources. Defined deliverables, fixed timelines, and accountability at the team level.

Onshore and Offshore Delivery

Flexible delivery across geographies. Choose the model that fits your project needs and budget.

ONSHORE (US)

- US-based consultants across all major metros
- Same timezone collaboration and client site presence
- Security clearance eligible roles
- Ideal for leadership positions and client-facing work
- Full compliance with US labor and tax requirements

OFFSHORE (INDIA)

- India-based talent for cost optimization at scale
- Round-the-clock development with timezone overlap
- Rapid team ramps for large-scale programs
- Sustained support and maintenance teams
- Significant cost advantage without quality trade-offs

HYBRID MODEL: Onshore leads paired with offshore execution teams for the optimal balance of cost, speed, and proximity.

Data & Analytics Talent

ROLES WE STAFF

- Data Engineers
- Analytics Engineers
- Data Architects
- BI Developers and Report Engineers
- Data Scientists
- ETL / Pipeline Developers
- Data Governance Analysts

PLATFORMS

Snowflake

Java / Spring

C# / .NET

Python

React

Angular

Node.js

Selenium

Cypress

REST / GraphQL

Microservices

Vetting & Quality Process

Every consultant goes through the same rigorous process, whether onshore or offshore.

01

Technical Screening

Hands-on coding assessments, architecture reviews, and platform-specific evaluations.

02

Domain Assessment

Industry and technology domain knowledge validated against client requirements.

03

Soft Skills Review

Communication, collaboration, and cultural fit evaluation for embedded team roles.

04

Background Verification

Comprehensive checks including employment history, education, and references.

Replacement Guarantee

If a consultant underperforms, we replace them at no cost.

Performance Monitoring

Regular check-ins and feedback loops throughout engagement.

Quality Over Volume

We submit 2 to 3 vetted profiles, not 20 unqualified resumes.

Engagement Model

Simple, transparent, and built for scale.

Rate Card Structure

Competitive and transparent rate cards with separate onshore and offshore tiers.

SOW or T&M Basis

Flexible commercial models. Fixed SOW for scoped work, time and materials for ongoing support.

48 to 72 Hour Profiles

Vetted candidate profiles delivered within 2 to 3 business days of requirement intake.

2 Week Onboarding

From profile approval to productive team member in 10 business days or less.

Dedicated Account Manager

Single point of contact for all requirements, escalations, and performance reviews.

Full Compliance

All documentation, background checks, IP agreements, and labor compliance handled by Vertis.

Why Vertis

Deep Bench

200+ consultants across data, cloud, ERP, AI, and application development. We cover the full technology stack.

Flexible Delivery

Onshore, offshore, or hybrid. You decide the model. We deliver the talent.

Speed to Deploy

Pre-vetted talent pools. Profiles in 48 to 72 hours. Onboarded and productive within two weeks.

Proven Track Record

20+ years, 80+ Fortune 500 clients. Our consultants have operated inside the programs that matter.

Let's Talk

We would welcome the opportunity to discuss how Vertis can support your staffing needs across any technology domain.
